## WARNING

This helmet is designed for laser welding and is made from conductive carbon fiber. Do not allow simultaneous contact with the stinger and grounded material to prevent electrical shock, burns, or injury. Always wear protective clothing and follow OSHA regulations.

### Proudly Built for Professionals:

Protects against UV/IR radiation during laser welding.

Designed specifically for laser welding applications (not for gas welding or other uses).

Durable, lightweight, and built for performance.

100% Made in the United States.

Innovative Laser Safety assumes no liability for misuse.  
Follow all safety instructions and use only as intended.
